No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1994 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

NOTICE TO CONTRIBUTORS:

The publishers wish to call your attention to the following instructions for preparing manuscripts for *Cognitive Psychology*: Format and style of manuscript should conform to the conventions specified in the "Publication Manual of the American Psychological Association" (1200 Seventeenth Street, N.W., Washington, D.C. 20036; 1983 Revision), with the exceptions listed below. Please note that it is the responsibility of the author that manuscripts for *Cognitive Psychology* conform to the requirements of this journal.

INFORMATION FOR AUTHORS

Cognitive Psychology publishes original empirical, theoretical, and tutorial papers, methodological articles, and critical reviews dealing with memory, language processing, perception, problem solving, and thinking. This journal emphasizes work on human cognition. Papers dealing with relevant problems in such related areas as social psychology, developmental psychology, linguistics, artificial intelligence, and neurophysiology also are welcomed provided that they are of direct interest to cognitive psychologists and are written so as to be understandable by such readers. There are no maximum or minimum length restrictions for journal articles. Minor or very specialized studies are seldom accepted.

All manuscripts should be submitted to: **Dr. Douglas L. Medin, Department of Psychology, Northwestern University, Swift Hall, 2029 Sheridan Road, Evanston, Illinois 60208.**

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Cognitive Psychology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

A manuscript submitted for publication is judged by three main criteria: (a) appropriateness of the subject matter for this journal; (b) significance of its contribution to knowledge; and (c) clarity and conciseness of writing. No changes in a manuscript may be made once it has been accepted and is in press.

Form. Type at least double-spaced throughout, including tables, footnotes, references, and figure captions, with 1 inch margins on all sides. Submit four complete copies. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s) name(s), and affiliation; at the bottom of the page type a short title, not exceeding 35 characters and spaces, and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. The address of correspondence should be given as a footnote to the appropriate author's name. *Page 2* should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations. Do not use final periods with units of measure that are abbreviated (cm, s, kg, etc.) in text or in tables, except for "in." (inch).

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number displayed equations consecutively, with the number placed in parentheses to the extreme right of the equation. Refer to numbered equations as Equation 1 or say "the first equation." Punctuate equations to conform to their place in the syntax of the sentence.

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in the text. Use Arabic numbers 1, 2, etc. In the text, refer to footnotes by superscript, 1, 2, etc.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout, on a separate sheet; avoid vertical rules. Supply a short descriptive title below the table number. Type table footnotes, lettered *a, b,* etc., at the end of the table. For further information, see the "Publication Manual," pages 83–94.

Illustrations. All illustrations are considered as figures, and must be supplied in finished form, ready for reproduction. Pages 94–105 of the "Publication Manual" describe concisely the proper preparation of line drawings and of photographs. Plan figures to fit the proportion of the printed page (allowing for the legend under the figure), and take care that lettering on the original is large enough to be legible after a reduction of 50–60%.

Number the figures with Arabic numerals in order of mention in the text. Supply descriptive legends (captions) for all figures. Type these (double-spaced throughout) consecutively on a separate sheet of paper.

Illustrations in color can be accepted only if the authors defray the cost.

References. Cite references in the text by surname of the author, followed by year of publication.

> Smith (1982) found that . . .
> Contrary results (Brown, 1984) have been . . .

When a reference has two authors, cite both names, as (Harris & Cooper, 1980). When more than two are involved, cite the surnames of all authors, with the date, at first mention, but in subsequent citations of the same reference give the surname of the first author followed by et al. and the year, as

> (Colberg, Matthews, & Cooper, 1983) *first mention*
> (Colberg et al., 1983) *second mention*

In citing more than one publication by the same author or authors in the same year, add suffixes a, b, c, etc, after the year, as (Smith, 1982a) and repeat the letter identification in the bibliography at the end of the reference.

Under the heading REFERENCES, arrange the literature citations in the text in alphabetical order according to the surname of the first author. Do not abbreviate journal names; write them out in full. Full information on forms of literature citations may be found on pages 107–117 of the "Publication Manual."

The following examples show style of capitalization and punctuation for journal articles, books, and edited books:

Biggs, J. B., & Collis, K. F. (1982). *Evaluating the quality of learning: The SOLO taxonomy*. New York: Academic Press.

Donchin, E., Ritter, W., & McCallum, C. (1978). Cognitive psychophysiology: The endogenous components of the ERP. In E. Calloway, P. Tueting, & S. Koslow (Eds.), *Brain event-related potentials in man* (pp. 349–441). New York: Academic Press.

Siegler, R. S., & Robinson, M. (1982). The development of numerical understandings. In H. W. Reese & L. P. Lipsitt (Eds.), *Advances in child development and behavior* (Vol. 16). New York: Academic Press.

Wilkinson, A. C. (1984). Children's partial knowledge of the cognitive skill of counting. *Cognitive Psychology,* **16,** 28–64.

[Use underline for journal names and book titles only.]

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints of each article will be supplied free of charge. Additional reprints can be ordered on the form accompanying the proofs.

Personal computer disks. Manuscripts may be submitted to *Cognitive Psychology* on

personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).

Clinical Therapist

Two positions open. Counsels individuals and families in their homes regarding psychological or emotional problems such as drug and alcohol abuse, stress, or family situations using evaluative techniques, and develops and implements therapeutic treatment plans in that home setting. Interviews patients to obtain information regarding medical history and other pertinent information. Observes clients to detect indications of abnormal physical or mental behavior. Plans and administers therapeutic treatment, such as behavioral modification, stress management therapy, and play therapy to assist patients in controlling behavioral disorders and other problems. Changes method and degree of therapy when indicated by clients' reactions. Discusses progress toward goals with clients, such as controlling drug abuse, alcohol abuse, spouse and child abuse, stress, and weight. Consults with medical doctor or other specialists concerning treatment plan and amends plan as directed. Refers clients to supportive services to supplement treatment and counseling.

Must be bilingual in Spanish and English. Master's degree with major in rehabilitative counseling and either six months on-the-job experience or three months in a mental health clinical training program with full-time client contact hours required. 40 hours at $456.80 per week. 11:00 am to 9:00 pm four days per week. Position located in Tampa; in-home therapy clients will be seen in central Tampa and outlying Hillsborough County.
